Surname / first name:	XENOPHONTOS Natasa		
Organisation:	Municipality of Lakatamia		
Address:	1 st April Str, no.11		
Postcode / Town:	2310 Lakatamia		
Country:	CYPRUS		
Email:	natasa@lakatamia.org.cy	Tel:	+357 22 364084
Mobile phone:		Fax:	+357 22 380688

Please develop the regional development issue tackled by the project (10 lines maximum):

Peri-riverine areas often suffer from landscape degradation, water/waste pollution, traffic congestion, youngster delinquencies and early-school leavers. The area running alongside Pedhieos river lags behind in renewable energy systems (RES), ICT and R&D. Exiting the economic crisis we must concentrate on smart growth locally. Groups suffering from social exclusion must be engaged proactively in energy education which will in turn make them employable and promote innovation.

Please describe the main objectives of the project (5 lines maximum):

- Collection of best practices: Consolidation of drought stricken rivers into potentially planned tram lines/ Overflow Rivers into potentially planned grey water systems/ recycle CDW/ compost green trimmings.
- Create skating parks/graffiti walls and climbing walls out of barren land, unused spaces along the river for positive youth attraction. Promote electricity creation through sport activity (e.g. cycling, skating, climbing to light the pedestrian road at night)
- Create a network of energy parks
- Create wi-fi cantine stops with latest GIS technology, 3D boards
- Set up a Museum of the 'senses' for Energy Education especially customized for people with disabilities
- Increase employment by driving growth and research in smart cities

Please describe the main activities planned in the project (15 lines maximum):

- Organisation of joint thematic seminars
- Organization of study visits
- Exchange of best practice
- Development of joint action plans
