Dear Sir or Madam,

Within the scope of the European Commission's vision of building seamless e-Government solutions in Europe, we are pleased to invite you to the 'Making e-services a reality in Europe' event organized by the e-SENS project, which will take place at the Public Research Centre Henri Tudor in Luxembourg on 6–7 November 2014.

The event will present the journey which the European Commission has undertaken together with Member States, and in particular:

- ICT-facilitated public services already made available by LSPs¹;
- the strong need to develop new public e-services in the digital era;
- progress in building generic solutions for electronic communication;
- the future of digital infrastructure for e-services in Europe.

The conference will be focused on e-SENS, which aims to make the Digital Single Market a reality by enhancing electronic public services in the EU.

Take this unique opportunity to learn about project results and the steps being taken to provide generic and re-usable building blocks for seamless cross-border communication.

The event will be attended by government delegates from across Europe, representatives of the European Commission as well as IT Industry, all dedicated to making e-Government a reality. We look forward to welcoming you at the Public Research Centre Henri Tudor.

Yours faithfully,

Carsten Schmidt
e-SENS project coordinator

**'Making e-services
a reality in Europe'**
